

Emin Mengi

Full Stack Developer

I am an aspiring full-stack developer with a growth mindset, eager to acquire new skills and continuously improve myself through new challenges. With a strong background in Mathematics, I decided to focus my career on software development, combining my analytical thinking and problem-solving skills with technology. To advance in this field, I completed a 6-month intensive Workintech full-stack development program, gaining experience in both front-end and back-end technologies as well as core computer science concepts.

Education

Workintech, Full Stack Development

Program (6 months - 960 hours - 78 projects)
2025

Eskisehir Osmangazi University,

Mathematics And Computer Sciences,
Master's Degree
2022 - 2025

Eskisehir Osmangazi University,

Mathematics And Computer Sciences,
Bachelor's Degree
2017 - 2021

Languages

English, Intermediate (B1-B2)

Certificates

Front End Development, Workintech,

08.2025

Full Stack Development, Workintech,

10.2025

Django-Python, Udemy,

06.2023

Artificial Intelligence Meeting, 23,

05.2025

SKILLS

Front End: Javascript, React.js, Laravel, Django, Hooks, Context API, Redux, Axios, Yup, Jest, Cypress, HTML, CSS, Tailwind Css, Bootstrap

Back End: Java, Python, C#, PHP, OOP, Data Structures, Design Patterns, Maven, Spring Core, Spring Boot, Spring Data JPA, Spring Security, SQL, PostgreSQL, JUnit, Mockito, Git, .Net

Additional: Algorithms, Debugging, Deployment, Problem Solving, Figma, Teamwork

SOFTWARE PROJECTS

E-Commerce App, Full Stack Developer - React

[GitHub](#) | [Website](#)

Fully responsive e-commerce website focused on delivering a modern online shopping experience using component-based architecture and clean UI.

- **Features & Functionality:** Responsive layout (mobile-first), product listing & category navigation, shopping cart with add/remove, interactive UI with Swiper sliders.
- **Routing & State Management:** React Router, Redux & Redux Thunk.
- **API & Notifications:** Axios integration, Toastify feedback.

Personal Portfolio Website, Full Stack Developer - React

[GitHub](#) | [Website](#)

A fully responsive personal portfolio website designed to showcase my projects, skills, and contact information. The site includes bilingual support (English/Turkish), dark mode, and a contact form integrated with third-party APIs. It reflects both my frontend development skills and attention to user experience.

- **Development & Design:** Built with React functional components and Tailwind CSS; created a clean, responsive UI with smooth navigation and dark mode support.
- **Functionality & Integration:** Language toggle (EN/TR) with Context API + localStorage, contact form with React Hook Form.

Pizza Order App, Full Stack Developer - React

[GitHub](#) | [Website](#)

Responsive web app for customizing and submitting pizza orders with real-time form validation, dynamic pricing, and mock API integration.

- **Features & UI:** Homepage with featured pizzas and menu items, order form with size, crust, and toppings selection, dynamic price calculation, and order summary on success page.

- **Functionality & Integration:** Form validation, page navigation with React Router DOM v5, and order submission to a mock API using Axios.

X (Twitter) Clone, *Full Stack Developer* - Spring Boot, React, PostgreSQL

Backend: [GitHub](#) | Frontend: [GitHub](#)

A full-stack social media web application replicating Twitter's essential features, built with Spring Boot for the backend and React + TailwindCSS for the frontend.

Implemented a JWT-based authentication system for secure login and registration, and designed a layered architecture with Controller-Service-Repository separation for clean maintainability.

Core Features:

- User authentication (register/login with JWT)
- CRUD operations for tweets, comments, likes, and retweets
- Real-time feed updates and profile-based filtering
- Responsive, modern UI built with

EXPERIENCE

MONEO YAZILIM, *Remote* - PHP Developer/Web Developer

2021

- Developed a **X (Twitter) clone** using Laravel, implementing core features such as user authentication, posting, following/unfollowing, likes, comments, and notifications.
- Built a **Library Management System** with PHP, including book CRUD operations (add, update, delete), user login system, and borrowing/return functionality.
- Focused on clean code practices, database management, and delivering scalable, maintainable web applications.
